Case Study

Administrator
LWC Burnley
Jodie Emmott

Jodie knew on leaving school that she wanted to learn while she worked.

She applied for an Admin Apprentice role through a local training provider.

Following successful achievement of Level 2 in Business Administration and her performance in her role during her first year apprenticeship, she is now the Administrator at the Burnley Centre, and is studying her Level 3 in Business Admin.

During this time she has also had the opportunity to access additional and role relevant courses to supplement and enhance her professional development.

Not only does her role encompass the day to day administrative and organisational requirements of a busy centre, she supervises the team of volunteers within the centre

She also has administrative support responsibility for the organisation's training provision throughout the East Lancashire area, ensuring promotion, recruitment and data capture.

As a new team of Apprentices is being recruited, she looks forward to mentoring and supporting the centre's Apprentice.

As for future aspirations?
Management & Leadership . .
